EUROSUN®

We bring optimal light into your office and home!

02

OPERATED

with the highest degree of comfort!

External blinds from EUROSUN enhance the quality of life in an appealing way.

They combine privacy protection, light control, anti-glare and anti-heat protection ideally in a high quality product.

Completely closed outdoor blinds protect you from people looking in

or block the view outside if desired, helping you maintain your privacy at will.

Thanks to the continuous adjustability of the horizontal slats, you can have as much indoors sun as you want, while still being able to see outside to a large degree.

The maximum use of daylight with simultaneous antiglare protection

ensures optimum working conditions in the office and a high quality of life in the home, without the need for artificial light or air conditioning.

EUROSUN exterior venetian blinds, which are carefully manufactured according to the European standards, meet the highest design, function and durability requirements. Create your living and work environments with EUROSUN!

EUROSUN external venetian blinds can be comfortably operated by remote control or wall switches thanks to high quality motor technology. Control devices like timer switches and brightness regulators can be easily retrofitted. So can the controls for all the blind groups be refitted.

EUROSUN also provides a variety of practical solutions for classical manual operation. Ask your qualified EUROSUN dealer for advice.

Our covering panels

EUROSUN outdoor blinds can be installed in a variety of covering panels, according to your individual requirements. Shape and colour schemes create appealing design accents at the highest aesthetic level.

EUROSUN slat systems

EUROSUN External blinds are available in three different slat shapes and in a variety of widths. While the flat slats and the slats with bordered edges appeal particularly to design lovers, the Z-slats are the perfect solution for people who want the highest degree of stability.

The z-slats combine perfect privacy and sun protection with exceptional stability due to their complete closing slat covering.
